The One-Touch Emergency Oxygen Unit

It's Always Safety First.

oxyQuik™ provides up to
25 minutes of oxygen,
so you won't have to wait
helplessly until EMS arrives.

Great to have on hand in public venues, such as:

- * Schools
- * Airports
- * Offices
- * Factories
- * Hotels
- * Retail Stores & Malls

FREQUENTLY ASKED QUESTIONS

What is the FDA definition of an emergency Oxygen Device?

ANSWER: Emergency Oxygen Equipment must deliver a minimum flow rate of 6 liters of oxygen per minute for a minimum of 15 minutes. Labeling for emergency oxygen may not contain references to heart attacks, strokes, shock or any other medical condition amenable to diagnosis or treatment only by a licensed practitioner.

Can I be sued as a result of providing assistance in an emergency?

ANSWER: General guidelines, as stated in the Medic First Aid Emergency Oxygen Student Guide, note that “Good Samaritan Laws,” which apply directly to administering oxygen in an emergency, have lessened the potential liability of providing such emergency care. Generally, these laws protect those who: voluntarily provide assistance which he or she would not otherwise be legally obligated to provide, expects nothing in return, and is not “grossly negligent” (which means completely reckless or careless in rendering care). [State Regulations may be found at www.cprinstructor.com/legal.htm.]

Where should oxyQuik be placed?

ANSWER: We advise oxyQuik to be placed or mounted next to a fire extinguisher/AED/First Aid center. The location must be away from heat and easily accessible.

What is the shelf life of the unit if it is not used?

ANSWER: Oxygen content is sufficient, as long as the contents gauge is in the green zone.

OxyQuik Optional Accessories:

<p>Wall Mount Box with Alarm Package <i>To help stop theft, vandalism or misuse</i></p> <p>Box Features:</p> <ul style="list-style-type: none"> - Size: 6 ¾ x 20 ½ x 6; high impact crystal polystyrene, .110 wall thickness - Virgin acrylic Plaskolite panel, .080 thickness - Chromium plated brass safety lock/key, weatherproof lock cover - Polypropylene molded hammer with flexible torsion, ribbed grip surface, and clear nylon-jacketed stainless steel mechanical cable <p>Alarm Features:</p> <ul style="list-style-type: none"> - Highly visible ‘stop sign’ design discourages wrongful use - Sounds a powerful 105 dB warning horn when activated - Deactivation pin provided for service by authorized personnel. - 9 VDC alkaline battery is included - Compact design 3.37 in.
